COURSES

Advanced CSS and Sass: Flexbox, Grid, Animations and More!

(October 01, 2021)

Udemy

- I learned how to make the website responsive using pure media queries instead of relying heavily on bootstrap.
- I learned Flexbox which I combined with media queries to make UI look as a column on mobile but as a row on desktop for example.
- I learned pseudo-classes like :checked and direct child selectors to show navigation sidebar on mobile based on hamburger button using pure CSS without javascript.
- I learned the :not pseudo-class by for example applying a margin on all elements except :last-child.
- I learned SASS including partials and their necessity in big projects, nesting which lets me know the layout of HTML and where should I edit CSS styles for a specific element.
- I learned SASS mixins which converts media queries with variable inputs into functions that I can use anywhere I like.
- I built a whole landing page all by myself not part of the course using pure CSS and SASS around 20 files and only one file of JavaScript with 11 lines of code.

React - The Complete Guide (incl Hooks, React Router, Redux)

(January 01, 2021)

Udemy

- I learned the difference between ReactJS class components and functions with hooks, that functions with hooks could minimize lines of codes of Component from 50 LOC to 35 LOC.
- I learned 2 different ways to deal with CSS from ReactJS: inline style, dynamic className prop.

The Complete 2022 Web Development Bootcamp

(January 01, 2020)

Udemy

I combined ReactJS To-do list code found on the internet with CRUD API for to-dos learned from the course, which used NodeJS, expressjs but not ReactJS by myself.
